Figures 14-19 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 5, there is no antecedent for the "flat surface"; line 6, no antecedent for the "original shape".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bell 1,842,383.

Bell shows a suction cup including a dome shaped portion 10, having an annular projection 17, 18, 19 protruding from the inner surface; and a rear fixing portion 12. Although Bell does not disclose that this suction cup may be attached to an arrow, it includes all features claimed and could be used for this purpose with no structural change.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bell in view of Stivers 873,628.

Stivers shows a dart including an air propulsion portion including a vane A of funnel shape, and a tip C. The tip is a sharp needle, which may be undesirable in play environments. One would recognize that a suction cup tip may be more desirable. For example, Bell shows that a suction cup may be used to attach an object to a surface. Using this suction cup would be an obvious modification to the dart of Stivers to make the dart safer for play.

\* \* \* \* \*

Claims 2-4 & 6-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
